

INSTRUCTION

Instructions for use

1. Connect the positive (red wire) and negative (black wire) to the battery, and connect the small red wire (ACC).
2. When installing this product, match the power rating to 1-30A, 2-20A, 3-10A, or 4-10A to avoid affecting the product's lifespan.
3. Ensure a secure connection between the vehicle light wiring and the controller output connector to prevent poor contact and power supply.
4. Ensure the remote control battery has sufficient charge. If all indicator lights on the control panel are off, please charge the controller first.
5. Turn on the main power switch, then press one of the number button on the remote control panel to control the lights on and off.
6. Strobe button: Press once for strobe mode (only 4-way version).
7. If the remote control is lost or damaged, a new remote control needs to be re-paired with the power box. Connect power supplies, and press and hold the pairing button (inside of the power box) for several seconds. The remote control and controller will automatically pair and are ready to use.
8. This remote control has a memory function and will remember the last power-off mode. The remote control distance is 30 meters.
9. Stickers are included. Please apply the stickers to the buttons on the controller according to your actual needs and functions.

- **Only a qualified auto-electrician should install this product. Do Not install this product if unsure.**
- **Failure to use specified installation parts or hardware will void the product warranty.**
- **For this product to operate at optimum efficiency, a good electrical connection to ground must be made. Do not install and/or operate this safety product unless you have read and understand the safety information contained in this manual.**
